

Yarra Ex-20 Australian Equities Fund

Gross returns as at 30 September 2024

	From 25 June 2018 [^]	1 month %	3 months %	1 year %	3 years % p.a.	5 years % p.a.	10 years % p.a.	Since inception % p.a.*
Yarra Ex-20 Australian Equities Fund	7.20	4.01	8.20	20.58	8.78	7.93	7.93	8.33
S&P/ASX 300 ex S&P/ASX 20 Accumulation Index [#]	7.24	4.05	9.09	20.30	5.36	6.75	N/A	N/A
Excess return (before fees) [‡]	-0.04	-0.05	-0.89	0.29	3.42	1.19	N/A	N/A

Past performance is not a reliable indicator of future performance. Taxes payable by investors have not been taken into account. The figures shown have been provided for illustrative purposes – they are unaudited and subject to change. The total returns shown are gross of all fees, meaning they do not reflect the deduction of any investment management fees which would reduce returns and assume reinvestment of all distributions. Investment in the fund is not available on a fee free basis and this should be factored into any analysis of past performance.

Net returns as at 30 September 2024

	From 25 June 2018 [^]	1 month %	3 months %	1 year %	3 years % p.a.	5 years % p.a.	10 years % p.a.	Since inception % p.a.*
Yarra Ex-20 Australian Equities Fund	6.23	3.93	7.96	19.50	7.81	6.97	6.80	7.12
S&P/ASX 300 ex S&P/ASX 20 Accumulation Index [#]	7.24	4.05	9.09	20.30	5.36	6.75	N/A	N/A
Excess return (after fees) [‡]	-1.01	-0.13	-1.14	-0.79	2.45	0.22	N/A	N/A

Past performance is not a reliable indicator of future performance. Taxes payable by investors have not been taken into account. The figures shown have been provided for illustrative purposes – they are unaudited and subject to change. The total returns shown are prepared on an exit to exit basis – they include all ongoing fees and expenses and assume reinvestment of all distributions.

[^] Effective 25 June 2018 the Fund's investment strategy, name and benchmark was changed. Performance prior to 25 July 2018 is provided here for consistency purposes only – the historical performance data shown relates to the previous strategy and should not be used to assess past or future performance of the Fund. Performance data relating to the previous strategy is available upon request. Past performance is not a reliable indicator of future performance. Taxes payable by investors have not been taken into account. The figures shown have been provided for illustrative purposes – they are unaudited and subject to change. The total returns shown are prepared on an exit to exit basis – they include all ongoing fees and expenses and assume reinvestment of all distributions.

* Inception date Yarra Ex-20 Australian Equities Fund: August 2010.

[#] The benchmark for the Yarra Ex-20 Australian Equities Fund has been amended since the Fund's inception. Effective 25 July 2018, the benchmark is the S&P/ASX 300 ex S&P/ASX 20 Accumulation Index, replacing the S&P/ASX 300 Accumulation Index.

[‡] Excess return: The difference between the Fund's return and the benchmark return.

Market review

The Australian Ex-20 equities market strengthened during the third quarter of 2024.

The S&P/ASX 300 Ex-20 Accumulation Index gained 9.1% for the quarter, taking its 12-month return to +20.3%. In comparison, the broader ASX300 returned +7.8% for the period. On a global scale, the MSCI World Index also generated a +6.0% return.

Real Estate (+19.1%) was the best performing sector during the period, as lower than expected CPI results during the quarter reduced the likelihood of future rate hikes, with Scentre Group (SCG, +20.0%), Stockland (SGP, +25.7%) and Charter Hall Group (CHC, +42.8%) all strong contributors during the quarter.

Materials (+12.1%) was also a strongly performing sector during the quarter. Mining companies were the main source of outperformance as commodity prices rose in September following news of a Chinese stimulus package, with Northern

Star Resources (NST, +24.9%), Newmont Corporation (NEM, +23.4%), and Evolution Mining (EVN, +34.2%) all contributing strongly to performance.

In contrast, Energy (-6.2%) was the worst performing sector during the period as global oil prices fell during the quarter. Beach Energy (BPT, -17.1%), Boss Energy (BOE, -20.3%) and Ampol (ALD, -3.6%) were all detractors during the period.

Key Contributors

Reliance Worldwide (RWC, overweight) – the plumbing supplies company outperformed during the period on the expectation of improving sales growth and operating leverage as the macro backdrop becomes more supportive of remodelling housing activity. At current levels, we believe the stock valuation doesn't give appropriate credit to the mid-cycle earnings power of the group considering the resilience of its end markets, the majority of which relates still to more non-discretionary, repair type housing activity.

Cochlear (COH, underweight) – the hearing solutions company underperformed following the release of its FY24 result which was below expectations. While we like the strong underlying ear implant demand outlook globally – supported by COH’s ongoing investment into clinical awareness – we are conscious that COH’s key developed, and emerging markets have now largely recovered following COVID as hospital capacity issues have normalised. Additionally, the upside from a successful product upgrade cycle (Nucleus 8 sound processor) is now well understood, making the valuation case difficult with the stock trading on 45.3-times FY25 P/E.

JB Hi-Fi (JBH, overweight) – the electronics retailer outperformed during the period following the release of its FY24 results. The company saw improved operating momentum through 4Q24, with improved sales resilience offsetting cost pressures across both JB-Hi-Fi Australia and The Good Guys. The business also declared an 80c special dividend and reported a strong start to FY25, which drove upgrades to consensus estimates. We continue to see long-term upside in JBH and expect the business to take share in the consumer electronics category, albeit the stock’s upside has moderated at 19.6-times FY25 P/E.

Key Detractors

Tabcorp (TAH, overweight) – the wagering operator underperformed during the period following the release of its FY24 results. The company rebased expectations under new management, removing its strategic market share targets, forward guidance for reductions in operating expenses and the expected Victorian license contribution in FY25. The company has also been impacted by weaker conditions in the domestic wagering market and operating deleverage, with turnover down across both retail (-0.7%) and digital channels (-4.9%) over the period.

WiseTech (WTC, underweight) – the leading developer of software solutions for the logistics industry outperformed during the period following the release of its FY24 result which included better-than-expected guidance for FY25. The EBITDA guidance was 5% ahead of consensus earnings expectations, with particularly strong exit EBITDA margin guidance of 53% for FY25. WTC also announced 3 new products for 2Q25 which typically support increased yield. We prefer other names in the technology sector given WTC’s demanding valuation of 101.1-times FY25 forward P/E.

Origin Energy (ORG, overweight) – the gas and electricity retailer underperformed following successive downgrades to FY25 EBITDA expectations for its energy markets division due to higher coal costs and lower than anticipated cost savings from the implementation of software platform Kraken. We do not believe either of these impacts will have a meaningful permanent impact on the earnings power of ORG.

Market outlook

Last month we reiterated our non-consensus view that the US Federal Reserve would commence an easing cycle with a 50bps reduction and that a 100bps of easing before year end was likely. In the end, the 50bps reduction carried out by the

Federal Reserve in September was greeted with enthusiasm by risk markets as they quickly embedded an expectation of successive 50bps hikes. Federal Reserve Chairman Powell has since attempted to dampen that expectation and a strong labour market report for September has clearly challenged the need for aggressive near-term easing. Nevertheless, the case for two successive 25bp rate cuts over the remainder of 2024 remains both justified and is our base case.

The additional catalyst for the month of October has been renewed efforts by Chinese authorities to bolster the Chinese housing market via a combination of mortgage rate reductions, lower downpayment requirements and liquidity facilities. While equity markets have interpreted this package very favourably, we caution that the prospect of a material reacceleration in Chinese housing turnover, house prices and new housing construction is likely to be closer to 18 months away. While Chinese equities and related assets may continue to rally on the expectation that Chinese policy makers will continue to ease policy, our view is that Chinese authorities have little intention to rapidly reflate the housing market. The objective is to stabilise and reflate in a controlled manner. As such, we caution against expecting meaningful shifts in demand for Chinese construction activity growth for at least 12 months.

Elsewhere, moderate inflation and easing activity data in Europe suggest the easing cycle in the Euro Area will continue, and together with New Zealand and Canada, the risk is skewing to greater easing in the near term. In short, our central thesis of moderating inflation and easing policy sufficient to generate a reflationary environment remains well in place.

Locally, Australia continues to operate with economic growth at near stall speed. GDP increased just 0.2% (q/q) and 1.0% (y/y) in 2Q24, the weakest annual rate of economic growth in 32 years (excluding COVID). The Reserve Bank of Australia (RBA) remains of the view that inflation is too high and that economic growth has been too strong for the supply side of the economy to respond. It is particularly uncertain on the outlook for the household savings rate as tax cuts are delivered and the risk that prior strong wealth gains translate to strong consumption growth. From our perspective the saving rate will rise rather than fall in coming quarters given the starting point is a saving rate already near zero, consumer spending remains subdued whilst income growth is recovering and the recent rise in the SG levy is a mandatory lift in the saving rate.

In concert with the observations that the buffer of liquid excess savings from the post-COVID period has now been completely depleted and a clear trend rise in the unemployment rate, it is likely that a bout of precautionary saving ensues in the months ahead. In the absence of easing, along with the decision to rapidly slow population growth from 1 Jan 2025 via cutting student numbers, the risks to economic growth projections are skewed to the downside. We believe the RBA will recognise that wage and inflation pressures have eased sufficiently by the end of 2024 and that they will commence a modest easing cycle at the December meeting.

Against this moderation in inflationary pressures we still expect economic growth to accelerate sequentially through 2H24, albeit remaining well below 'potential' growth. The growth outlook should be supported by ongoing business investment and a recovery in real household income growth driven by ongoing wage growth, income tax cuts, cost of living support delivered in the Budget and the commencement of the rate easing cycle later in 2024.

We expect economic growth to average 1.5% versus a consensus forecast of 1.2% in 2024, bond yields to finish the year at 4.0%, the \$A/\$US to reach 72c, and Australian equities to return 10-12%.

We are most overweight stocks within the Communication Services, Utilities and Consumer Discretionary sectors and underweight Real Estate, Industrials and Energy.

Sector allocation

	Portfolio %	Benchmark %	Active %
Communication Services	13.52	4.81	8.71
Consumer Discretionary	8.17	7.66	0.51
Consumer Staples	3.31	3.30	0.01
Energy	0.00	3.40	-3.40
Financials	12.01	13.80	-1.79
Health Care	9.11	10.39	-1.28

Income and growth

	1 year %	3 years % p.a.	5 years % p.a.	10 years % p.a.
Growth return	17.86	5.75	4.98	4.26
Distribution return	1.64	2.06	1.99	2.54

The Growth Return is measured by the movement in the Fund's unit price, ex-distribution, and can be positive or negative as the unit price can fluctuate with changes in the underlying market value of the Fund's assets. The Distribution Return is the amount that is paid to unitholders by way of income distribution in a 12-month period. It does not include capital distributions.

Features

Investment objective	To achieve medium-to-long term capital growth through exposure to Australian Securities Exchange listed securities excluding the largest 20 by market capitalisation (as defined by the S&P/ASX 20 Index). In doing so, the aim is to outperform the S&P/ASX 300 ex S&P/ASX 20 Accumulation Index over rolling 3-year periods.	
Recommended investment time frame	5 - 7 + years	
Fund inception	August 2010	
Fund size	A\$63.5 mn as at 30 September 2024	
APIR code	JBW0052AU	
Estimated management cost	0.90% p.a	
Buy/sell spread	+/- 0.15%	
Platform availability	BT Panorama Hub24	Praemium
