Strengths

- Senior investment team members have significant experience and tenure.
- The Fund leverages on the considerable additional resources Goldman Sachs provides.
- Disciplined and repeatable investment process underpinned by strong academic research.

Weaknesses

- The KDMs have responsibilities across all strategies offered by the QIS team and is not solely dedicated to managing the Fund.
- The Manager has significant AUM firmwide, that may cause implementation hurdles for the strategy.

Product Opinion

The Fund has received a **'Recommended'** rating following its initial review. The Fund is managed by a well-resourced, experienced and appropriately credentialed investment team. The team's research agenda and enhancements to the quantitative model is a positive, reflecting a strong ongoing commitment to improve the Fund's alpha signals. The process is considered to be logical and repeatable, providing exposure to a diversified global equities portfolio. That said, the significant firmwide AUM may cause implementation hurdles for the underlying strategy.

Who is the Manager?

Goldman Sachs Asset Management, Australia Limited ('the Manager') is a wholly owned subsidiary of Goldman Sachs Asset Management ('GS' or 'Goldman Sachs'). Goldman Sachs is a global investment banking, securities and investment management firm. Founded in 1869 and headquartered in New York, the firm manages a high level of assets across traditional and alternative strategies.

Lonsec Opinion

Profitability

The Manager is considered a large and well-established asset management firm with diversified AUM across all major asset classes. At these current levels of AUM, the manager is considered to be in a strong financial position.

Business Track record

Goldman Sachs has a long and successful track record. The firm has diversified its business through investment capabilities such as equities, fixed income, alternatives and listed property. This has led to strong AUM growth across all distribution channels.

Business Ownership

Given Goldman Sachs is listed on the NYSE (GS), there is limited oversight on business ownership among staff, however, employees withhold the ability to own equity through remuneration schemes. As the firm is consistently profitable at current AUM, the business is well-capitalised.

Business Governance

Given its status as a one of the largest asset management firms globally along with its ability to operate across multiple jurisdictions, the Manager demonstrates multiple layers of compliance and risk monitoring. There have been no reputational issues noted to date.

Who is the Team?

Goldman Sachs' Quantitative Investment Strategies (QIS) Equity Alpha Team is led by Managing Directors Osman Ali and Dennis Walsh who are also co-portfolio managers ('co-PM') for the Fund. The other co-PMs for the Fund include Co-Head of Alpha Research Takashi Suwabe and Head of Portfolio Construction Len Ioffe. All PM's have over 20 years of investment experience and at least 10 years of leadership experience at Goldman Sachs. The co-PMs are responsible for risk management and portfolio construction.

The QIS Equity Alpha team comprises of three primary teams: Alpha Research, Portfolio Construction & Implementation and Client Portfolio Management with each team holding differing roles across the Fund's investment process. There is additional support for the Fund through the Trading, Stewardship & ESG and Engineering teams.

Lonsec Opinion

Skill

Ali and Walsh are seasoned investors with lengthy investment experience and appropriate credentials to lead the team. Additionally, Suwabe and Ioffe are highly capable and experienced investors with significant quantitative and portfolio management insights. The broader teams consist of capable investment professionals led by experienced team leaders, who have an average of 22 years of experience and effectively assist the key decision makers.

The multiple office locations for the research team can help assist in the generation of differentiated insights but can also detract from a consistent culture. That said, the team holds consistent team meetings and utilise cross-border reporting lines to mitigate this risk.

Team Size

The team size is large compared to peers and the size of the investment universe. Given the number of competing equity strategies managed by the team and AUM, the team's size is commensurate with the breadth required to effectively implement the investment process. Further to this, the additional support from the wider business such as the Engineering, Trading and Stewardship & ESG team adds to the depth of size and large support for the co-PMs.

Track Record/Co-Tenure

In comparison to peers, all co-PMs for the Fund have both significant tenure at the firm and co-tenure with the QIS team. There have been no changes to the co-PMs of the strategy within the last five years. This stability is extended across the team and given the large size, staff turnover is reasonable.

Alignment

The co-PMs alignment with end investors is moderate. Given the large structure of the business compared to peers there is limited direct formal ties to both the success and tie-in of their strategy via equity ownership. However, there is opportunity for professionals to receive equity based awards as part of the firm's discretionary year-end variable compensation. Further, the proportion of variable remuneration linked to performance is discretionary in nature and holds less structured in comparison to peers. Positively, the KDM's are co-invested in the underlying strategies that they manage.

Key Person Risk

Quantitative processes, by their nature, engender a lower level of individual accountability. Portfolio construction is largely systematic and the research effort tends to be a fusion of the insights of a number of individuals across sub-teams. That said, there is moderate key person risk with Ali and Walsh given their leadership of the broader team.

Process

What is the Investment Process?

The Manager employs a core-oriented, quantitatively driven investment process with the aim of constructing a portfolio with style, risk, and capitalisation characteristics similar to the benchmark, positioned to outperform through superior underlying stock selection. The process, by its nature, is highly systematic and model driven.

The quantitative model aims to seek out alpha-driving opportunities in the market by applying signals based on four key return drivers: Fundamental Mispricings, High-Quality Business Models, Market Themes & Trends, and Sentiment. This approach centres on identifying proprietary signals paired with dynamic weighting of each driver to capture a diversified portfolio of 350-750 small-cap stocks. Portfolio construction considers the alpha model's return forecasts and optimises the portfolio to maximise alpha while minimising risk, subject to portfolio constraints, transaction costs and stock liquidity.

Lonsec Opinion & Supporting Facts

Philosophy and Universe

Investment Type	Quantitative
Investment Approach	Bottom-up
Investment Style	Other
Typical market cap	Small
Minimum market cap	Unconstrained
Available Universe	Securities in major benchmarks from multiple benchmark providers which includes the MSCI World Small Cap Index

The Manager is believed to apply a disciplined and well-developed investment process, consistent with many well-executed quantitatively driven investment approaches. The investment philosophy is dynamic and has the ability to uncover alpha through differing return drivers. This approach is highly applicable to the Fund's universe and is consistent with the long-term outperformance objective.

Research Process

Key screens	Balance Sheet, Earnings, Liquidity, Market Cap, Sector and Region
Screened universe	7,500
Idea generation	Ideas are typically generated by members of the Alpha Research group. External academic research and conversations with clients are also utilised
Stocks researched	7,500
Annual manager meetings	2,219
Key research inputs	Various – academic research, market news flow and company data
Primary valuation approach	Relative valuation used as a factor in alpha model

The sharing of models across strategies, commonly seen in quantitative strategies, helps ensure the research program is efficient and impactful across the firm. There is a formalisation to the research agenda, providing structure and clarity, with bi-annual signal enhancements added to the model each year. The continuous evolution of the signals, along with the dynamic approach in which they are combined, is viewed positively, and is enhanced through the use of high-quality, internally regulated data sets. Throughout the process, there is low reliance on external tools due to the strong proprietary systems developed over time, providing added breadth compared to peers. Differentiation and continuous innovation are key attributes of long-running successful quantitative-centric managers and are vital in preventing alpha decay.

Process (continued)

Portfolio Construction

Portfolio management structure	Multi-PM
Approach to benchmark	Benchmark aware
Typical security numbers	500
Typical securities range	350-750
Typical portfolio turnover p.a.	150%
Typical active share	82%

The Manager's portfolio construction process is considered to be logical and consistently applied, typical of many well-executed quantitatively driven investment approaches. Portfolio construction considers the model's return forecasts and optimises the portfolio to maximise alpha while minimising risk, subject to portfolio constraints, transaction costs and stock liquidity. Additionally, PMs have scope to modify portfolio positioning as part of their 'human overview' to control 'outsized positions' that may result from corporate actions or incidental macroeconomic or geopolitical developments.

Capacity Management

Capacity guidance	\$10bn remaining (Soft)
Strategy AUM	\$1.15bn
Portfolio liquidity (1 week)	99.9%
Substantial holdings by manager	10
Strategy previously closed	No

The team do not have a formal capacity limit. At currently levels of AUM there are no capacity concerns and the Manager has advised a minimum of \$10bn in remaining capacity given the current size of the global small-cap universe.

Investment Risk Management

Monitoring external to investment team	Yes
Frequency of monitoring	Daily
Primary risk management system	Proprietary Tool system
Security Limits (Min./Max.)	Soft limit: 0-2% Benchmark Relative
Sector Limits (Min./Max.)	Soft limit: 0-2% Benchmark Relative
Country Limits (Min./Max.)	Soft limit: 0-3% Benchmark Relative
Non-index Allocation (Typical, Max.)	Unconstrained
Cash Allocation (Typical, Max.)	0.5-2.5%

Risk monitoring and management is highly integrated within the Manager's quantitative investment process, in line with other quantitative peers of a similar size. The Manager's risk management approach is viewed as prudent and in line with the Fund's objectives. The Fund is designed to deliver moderately higher returns with broadly similar characteristics to its benchmark, as reflected in the ex-ante tracking error target of 2.75% p.a. The PMs are seen as the first line of defence for risk monitoring, while the internal risk management team is responsible for the overall risk governance framework and for establishing appropriate risk management best practices. The risk tools utilised are also in line with similar peers, utilising a combination of proprietary and third-party systems.

ESG

Manager Positioning

Responsible investment style	ESG Integration
ESG approach	Rising Stars
Sustainability thematic	Not applicable
Non-financial objective	None

Sustainability Score

No score.

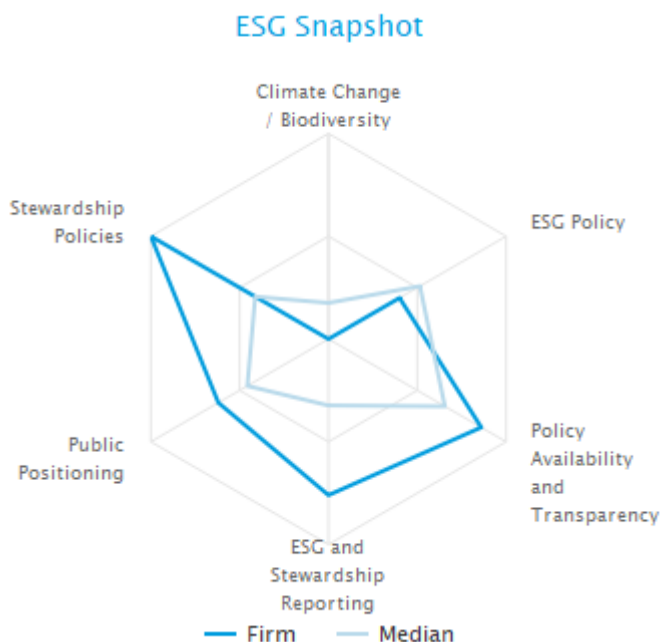

What is the Manager's ESG approach?

The Manager has indicated that their Responsible Investment style is 'ESG Integration' and as such that they take Environmental, Social and Governance factors into consideration when assessing investment opportunities. With a primary ESG style of 'Rising Stars' the Managers take a value creation approach in that they search for companies that have a potential to improve their ESG management over time, often from a low base. As a result, these Managers may invest in companies with very poor ESG scores or credentials and this may conflict with some client's perception of what a strong ESG process would deliver.

Lonsec Opinion & Supporting Facts

Overview

ESG Process Score Mod

Product Level Approach

The Manager has an appropriately structured approach to the collection and use of ESG specific data. They access multiple providers and data feeds into research models. While there is evidence of ESG research forming an element of the overall research activities, however, there is less structure to the Manager's approach than in leading managers. There are defined links from the Manager's research to the stock selection process through their quantitative stock selection models. There is monitoring of ESG characteristics of the portfolio across a number of ESG and sustainability dimensions, however, this plays a limited role in overall portfolio construction. There are no signs that company engagement on ESG issues is a component of the Manager's current investment approach for this Fund.

Strategy: Clarity, Measurability & Reporting

This product does not make any specific claim to being a sustainable, ethical or impact offering. As such, the alignment review does not apply to the product and thus scores its risk of misalignment as not applicable.

Manager Level Approach

The Manager's overall ESG policy framework and disclosure is aligned with similar size peers. The Manager has an articulated commitment to their integration of ESG within their investment process with evidence of clear public positioning. Relevant ESG policies, including stewardship and proxy voting policies, are publicly available. While the ESG policy is rather generic, the stewardship policies provide clarity on the Manager's stewardship approach. Reporting on voting and engagement outcomes is publicly available, although further disclosure at the company level would be welcomed.

Buy/sell spreads	0.10%/0.10%
Investment structure	Direct
Product type	Managed Fund
Currency hedged	Unhedged
Use of derivatives	Active risk management
Types of derivatives	Futures

What is the Product Structure?

The Fund is an Australian unit trust and is currency unhedged. Yarra Funds Management is the Responsible Entity ('RE') and has appointed Goldman Sachs Asset Management as the Investment Manager of the Fund. The Fund is a long only equity product that can only invest in global small caps.

Lonsec Opinion

Service Providers

The Manager has engaged large 'tier 1' service providers for critical functions such as custodial, administration, auditing and broking services. While the Fund uses a related party RE, there have not been any issues with this model since the Fund's inception.

Operational 'Red Flags'

The Fund is a relatively straightforward global equities strategy, investing in small cap stocks with no stated minimum market capitalisation. As such, this may pose some operational and liquidity challenges at times of market dislocation given the daily liquid nature of the Fund.

Wind-up Risks

The wind-up risk for the Fund is moderately low. The Fund is well-supported by Yarra's distribution team and has seen strong levels of flows over the last 12 months with a noted strong pipeline for further growth.

Fees

Annual Fees and Costs (% p.a.)

Management fees & costs	1.25
Performance fee costs	0.00

Performance Fees

Applicable	No
------------	----

Fees Explained

The Fund charges a management fee of 1.25% and does not charge a performance fee.

Management Fees and Costs Peer Comparison (31/07/2023)

Annual Fees and Costs Peer Comparison (31/07/2023)

Lonsec Opinion

Annual Fees and Costs

The total fee load for the Fund is in line with the peer median.

Fairness

Given the absence of a performance fee, total fees and costs are capped which provides certainty. This is consistent with quantitative strategies.

Performance data is as at 31 October 2023

Performance

Performance Summary

PDS return objective	To achieve medium-to-long-term capital growth through exposure to smaller companies globally
Internal return objective	Benchmark +2.55% p.a. (gross) over a full market cycle (3-5 year period)
Internal risk objective	Tracking error of 2.75% over a full market cycle (3-5 year period)
Product benchmark	MSCI World Small Cap NR Index AUD
Lonsec peer group	Quantitative

Alpha Generation

Note: Given the change in Investment Manager to Goldman Sachs in February 2016, performance history prior to this date is not attributable to the current investment team.

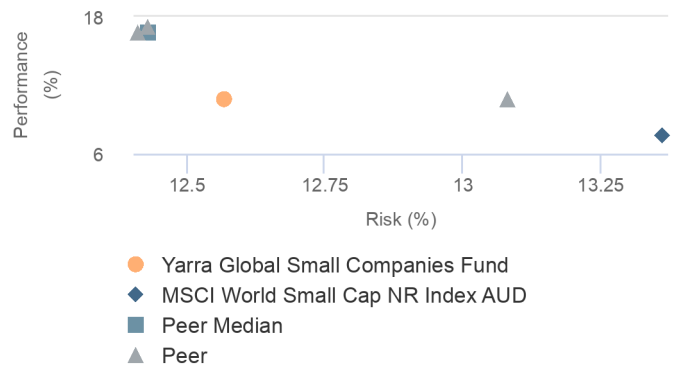

The Fund has outpaced the benchmark over all assessable time periods, however, has not outperformed the peer median over the one and five-year period. That said, the Fund's quantum is considered moderate, having achieved its long-term outperformance objective.

Calendar Year Excess Return

Yarra Global Small Companies Fund vs MSCI World Small Cap NR Index AUD

3 Year Risk and Return

Alpha Consistency

The Fund has consistently outperformed the benchmark over the short to long term. However, on peer relative basis, the Fund has continued to remain marginally below the peer median across most time periods.

Growth of \$10,000 Over 10 Years

Returns Consistency

Performance data is as at 31 October 2023

Performance (continued)

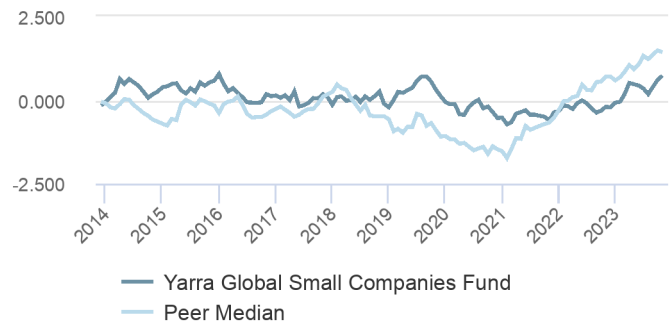

Benchmark Relativity

The Fund's three-year tracking error of 4.32% is above the Manager's long term tracking error objective of 2.75%. However, the Fund's tracking error has remained in line with the peer group's median.

3 Year Rolling Tracking Error Over 10 Years

3 Year Rolling Information Ratio Over 10 Years

Return Volatility

The Fund has displayed a volatility profile in line with the benchmark over three-year rolling periods, and also below the peer median. The Fund's rolling three-year Sharpe ratio tended to be relatively higher than the benchmark and peers.

3 Year Rolling Standard Deviation Over 10 Years

3 Year Rolling Sharpe Over 10 Years

Product Defensiveness

Given the Fund is highly diversified through its exposure to 350-750 securities, it has provided strong downside protection compared to peers. This is evidenced by its drawdown profile, experiencing benchmark-like drawdowns with strong recovery over most assessable periods.

Market Capture Ratio

Drawdowns

Ratings

'**Highly Recommended**' rating indicates that Lonsec has very strong conviction the product can meet its investment objectives.

'**Recommended**' rating indicates that Lonsec has strong conviction the product can meet its investment objectives.

'**Investment Grade**' rating indicates that Lonsec has conviction the product can meet its investment objectives.

'**Approved**' rating indicates that Lonsec believes the product can meet its investment objectives.

'**Not -Approved**' rating indicates that Lonsec does not believe the product can meet its investment objectives.

'**Closed / Wind Up**' status is applied when the product has been closed.

'**Fund Watch**' status is applied when a rating is under review due to the occurrence of a significant event relating to the product.

The '**Redeem**' rating indicates Lonsec no longer has sufficient conviction that the product can meet its investment objectives.

The '**Screened Out**' rating indicates Lonsec was unable to attain sufficient conviction that the product can meet its investment objectives.

'**Discontinued Review**' status is applied where a product issuer withdraws the product from the review process prior to completion, for any reason other than the product being closed or unavailable to investors.

The '**Ceased Coverage**' status is applied when a rated product is withdrawn from the research process by the product issuer.

General

Climate Change / Biodiversity: the extent to which a manager has a leading climate and biodiversity policies.

ESG and Stewardship Reporting: the transparency, accessibility and usefulness of a manager's reporting.

ESG Policy: the strength of commitment to ESG as ascertained by a review of a manager's ESG policies.

Excess return: Return in excess of the benchmark return.

Information ratio: Relative reward for relative risk taken (Excess Returns / Tracking Error).

Key decision maker (KDM): A nominated investment professional who has portfolio decision making discretion for a Fund, e.g. 'buy' or 'sell' decisions.

Market capture ratio: A product's performance during either 'up' or 'down' market trends relative to an index.

Policy Availability / Transparency: the ease of public access to, and transparency of, a manager's overall ESG policy suite.

Public Positioning: the resolve of a manager's commitment to ESG as ascertained by their public positioning.

Returns consistency: The proportion of a product's monthly outperformance during a period relative to the benchmark when it was rising, falling and in aggregate.

Sharpe ratio: Excess return earned for additional volatility experienced when holding riskier assets versus risk-free asset.

Standard deviation: Volatility of monthly Absolute Returns.

Stewardship Policies: the strength of a manager's proxy voting and engagement policies with respect to ESG.

Time to recovery: The number of months taken to recover the Worst Drawdown.

Total return: 'Top line' actual return, after fees.

Tracking error: Volatility of monthly Excess Returns against the benchmark (the Standard Deviation of monthly Excess Returns).

Worst drawdown: The worst cumulative loss ('peak to trough') experienced over the period assessed.

Lonsec Research FSG

Financial Services Guide

Lonsec Research

9 June 2023

This Financial Services Guide (FSG) has been prepared and issued by Lonsec Research Pty Ltd ABN 11 151 658 561 (Lonsec Research, we, us, our), holder of Australian Financial Services Licence (AFSL) No. 421445, to assist you in determining whether to use our financial services and products. This is an important document, and you should read it carefully. The contents of this FSG are general information only and does not take into account your personal needs or objectives. Lonsec Research provides no warranty as to the suitability of the services of this FSG for any particular person.

1.1 What is a Financial Services Guide?

This FSG's purpose is to provide you with important information regarding services offered by Lonsec Research. You should read this FSG prior to using our services. This document was prepared to inform you about:

- who we are and our contact details;
- the financial services we provide;
- the remuneration that may be paid to us and other persons in relation to the financial services we provide;
- how we deal with conflicts of interest; and
- how we deal with complaints

1.2 About Lonsec Research and its related parties

Lonsec Research provides in-depth, investigative investment research across a broad range of listed and unlisted investments. Lonsec Research is a wholly owned subsidiary of Lonsec Holdings Pty Ltd (ABN 41 151 235 406) (Lonsec Holdings). Other subsidiaries of Lonsec Holdings include SuperRatings Pty Ltd (ABN 95 100 192 283), Implemented Portfolios Pty Limited (ABN 36 141 881 147) and Lonsec Investment Solutions Pty Ltd (ABN 95 608 837 583). All employees of the Lonsec group entities, including Lonsec Research, are employed by Lonsec Fiscal Pty Ltd (ABN 94 151 658 534).

1.3 What kind of financial services can Lonsec Research provide?

Lonsec Research is authorised under its Australian Financial Services Licence to provide general financial product advice to retail and wholesale clients on the following types of financial products:

- securities
- deposit and payment products limited to basic product products
- derivatives
- interests in managed investment schemes including investor directed portfolio services
- superannuation
- retirement savings accounts
- foreign exchange products
- life products including:
- investment life insurance products as well as any products issued by a Registered Life Insurance Company that are backed by one or more of its statutory funds; and
- life risk insurance products as well as any products issued by a Registered Life Insurance Company that are backed by one or more of its statutory funds;

Lonsec Research is also authorised to deal in a financial product by arranging for another person to apply for, acquire, vary, or dispose of the above types of products for or by retail and wholesale clients.

1.4 Provision of general advice

Any advice that Lonsec Research provides is of a general nature and does not take into account your personal financial situation, objectives or needs. You should, before acting on the information, consider its appropriateness having regard to your own financial objectives, situation and needs and if appropriate, obtain personal financial advice on the matter from a financial adviser. Before making a decision regarding any financial product, you should obtain and consider a copy of the relevant Product Disclosure Statement or offer document from the financial product issuer.

1.5 How Lonsec Research is paid

Lonsec Research receives fees from Fund Managers and/or financial product issuers for researching their financial product(s) using comprehensive and objective criteria. Lonsec receives subscriptions fees for providing research content to subscribers including financial advisers, fund managers and financial product issuers. Lonsec Research's fees are not linked to the financial rating outcome of a particular financial product. Lonsec Research fees are determined by private agreement with its clients depending on a number of criteria including the number of financial advisors who access Lonsec Research publications, the range of publications accessed and the complexity of a specific research assignment.

Lonsec Research FSG (continued)

Due to the specific nature of its charges, disclosure of Lonsec Research fees may not be ascertainable when you receive this FSG, but you are able to request this information in writing before a financial service is provided to you. The fees received by Lonsec Research do not have an effect on the inclusion (or otherwise) of a financial product in portfolios managed by Lonsec Investment Solutions; or in approved product lists as a result of Lonsec Investment Solutions consulting activities. We do not have any direct employees as all employees are contracted, for employment purposes, with Lonsec Fiscal, a subsidiary of Lonsec Holdings. All employees of Lonsec are paid a salary and may receive a discretionary bonus which is not guaranteed. Sales employees may have a sales commission plan, relevant for sales to Wholesale clients, as offered by Lonsec Research from time to time at its discretion.

1.6 How do we manage our compensation arrangements?

Lonsec Research has Professional Indemnity insurance arrangements in place to compensate clients for loss or damage because of breaches of any relevant legislative obligations by Lonsec Research or its representatives which satisfy section 912B of the Corporations Act 2001.

1.7 What should you do if you have a complaint?

Lonsec Research's internal complaints handling process is designed to ensure that your concerns are treated seriously, addressed promptly and fairly. A complaint may be lodged either verbally or in writing and will be dealt with in strict confidence. If you have a complaint relating to Lonsec Research's products, services, its employees, the complaint should be addressed to:

Complaints Manager

Level 39, 25 Martin Place
Sydney NSW 2000

Tel: 1300 826 395

Email: complaints@lonsec.com.au

An individual may request further information about Lonsec Research's internal complaints handling procedure at any time. If an individual is not satisfied with the outcome of their complaint or has not received a response within 30 days from Lonsec Research, the individual can complain to the Australian Financial Complaints Authority (AFCA). AFCA provides an independent dispute resolution service and can be contacted on:

Online: www.afca.org.au

Email: info@afca.org.au

Phone: 1800 931 678

Mail:

Australian Financial Complaints Authority
GPO Box 3
Melbourne, Victoria, 3001.

1.8 Conflicts of Interest

Lonsec Research is aware of the inherent potential conflicts of interest associated with the provision of ratings and how we are remunerated for our services. There are a comprehensive set of policies, and procedures in place at Lonsec Holdings that apply to its subsidiaries including Lonsec Research.

Information barriers (both permanent and temporary) consistent with our regulatory obligations under Regulatory Guide 79 are in place to manage either perceived or actual conflicts of interest. Employees of Lonsec also have to abide by Personal Trading and Gifts and Entertainment requirements and are trained on these requirements from time to time.

Generation Development Group Limited (ACN 087 334 370), a shareholder of Lonsec Holdings, is the parent company of Generation Life Ltd who issue a series of products rated by Lonsec Research. Lonsec Research manages this potential conflict by disclosing to investors accessing our research of Generation Life related products, and implementing our comprehensive ratings process, information barriers and monitoring program. For more information refer to Lonsec Research Ratings Methodology available on our platform iRate or by contacting us on 1300 826 395.

Lonsec Holdings has appointed Australian Retirement Trust Pty Ltd ABN 88 010 720 840, AFSL 228975 as the provider of default superannuation services to its Group employees. Lonsec Holdings appointment of Australian Retirement Trust is not an endorsement of, or opinion on, the Fund.

Australian Retirement Trust is a subscriber to our services and pays a fee to us for this subscription service. Australian Retirement Trust rating and report is issued by an analyst who is aware of Australian Retirement Trust's appointment as default superannuation fund provider but who does not have a personal investment in the fund.

This FSG was prepared on 9 June 2023.
